## DETAILED ACTION

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. **Claims 1-14 and 29-32**, drawn to a solid state imaging device, classified in class 250, subclass 208.1.
  - II. **Claims 16-28 and 33-35**, drawn to a system for generating digital images and a method thereof, classified in class 250, subclass 214R.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because means for storing a digital value and means for collecting additional charge of invention II are not essential to the solid state imaging device of invention I. The subcombination has separate utility such as memory.
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 2878

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
